We are humbled and thank you in your decision to choose our cabinets. Competition among cabinet companies throughout the world is fierce; and in spite of these conditions Smart Cabinetry has made progress due to its advanced management philosophy, designed to ensure a better future for its customers. Our management philosophy is simple; trust and a hands-on approach are at the core of our business. We strive to be the best, which is only possible if our customers we value, our communities we live, the environment we operate, and our facilities where we manufacture are in balance. Smart Cabinetry has continued to engage in environmental activities such as the use and development of environmentally friendly technologies and clean production. Additionally, Smart Cabinetry is continuously striving to fulfill its responsibility as a good ‘citizen’ - through organizational contributions to the communities we serve. Our values have not changed yet they continue to evolve with you, our customer.

Our pledge to you is to manufacture cabinets under our guiding principles:

**INTEGRITY.** The foundation for all that we do. Integrity includes honesty, decency, consistency, and courage. We are committed to building on these values. **DIALOGUE.** We will listen carefully to diverse points of view and engage in thoughtful dialogue. We will broaden our understanding of issues in order to better address the needs and concerns of our customers and each other. **TRANSPARENCY.** We will ensure that information is available, accessible, and understandable. **SHARING.** We will share knowledge and technology to advance our understanding, to improve our products and the environment. **BENEFITS.** We will use sound and innovative manufacturing practices and thoughtful and effective stewardship to deliver high-quality products that are beneficial to our customers and to the environment. **RESPECT.** We will respect the religious, cultural, and ethical concerns of people throughout the world. The safety of our employees, the communities where we operate, our customers, consumers, and the environment will be our highest priority. **ACT AS OWNERS TO ACHIEVE RESULTS.** We will create clarity of direction, roles, and accountability; build strong relationships with our customers and external partners; make wise decisions; steward our company resources; and take responsibility for achieving agreed-upon results. **CREATE A GREAT PLACE TO WORK.** We will ensure diversity of people and thought; foster innovation, creativity and learning; practice inclusive teamwork; and reward and recognize our people.

We will live by our values, have fun, and take pride in what we do. Our values are to maintain a work environment where people enjoy coming to work, to serve and exceed customer expectations, and to be profitable and result oriented.

Online Order Entry

We’re very pleased to offer our Online Order Entry system to our Dealers. As a valued customer, you’ll now be able to create, modify, duplicate, and submit any order online from our website! Orders entered online reduce confirmation errors, and allow for quicker order submissions.

To get started, contact customer support for your unique log-in ID and Password. Visit www.SmartCabinetry.com, and start entering orders the smart way.

Copy Orders
Duplicate an order at the push of a button. Copy all of your order’s data into a new order where you can change anything you’d like. And now you can submit multiple orders at once too. Large project work can be entered in a matter of minutes!

Cabinet SKU’s at your fingertips
Our new SKU list has auto-completion, so finding the right part number has never been easier. The new system makes it a breeze to submit an order to us, saving you and your customers time.

Online Ordering available only for registered dealers of Smart Cabinetry. Dealers must apply through our application process including the following forms: Distributor/Dealer Profile, Personal Guarantee, DNBi Credit Application (must be completed online), and the Tax Exempt Form. Information regarding the application process can be found on our website: www.smartcabinetry.com/creditpolicy.php

Revised - 12/22/14
Environmental Certifications

Smart Cabinetry is nationally recognized by ANSI/KCMA to have passed a rigorous battery of tests that simulate many years of typical household use. Testing is performed by approved third party independent laboratories. Samples for testing are selected in an unannounced visit to our manufacturing plant. To find more information about KCMA, visit kcma.org

The Kitchen Cabinet Manufacturers Association developed the Environmental Stewardship Program to encourage practices that benefit the environment. The voluntary program gives cabinet manufacturers a way to demonstrate their commitment to sustainability and helps to identify products that are better for you, your home, and the environment.

FSC Chain of Custody certification allows us to label our products that were produced from responsible forest management materials. Allowing us to identify which products are eligible for US Green Building Leadership in Energy and Environmental Design (LEED) rating system’s points. For more information about Smart Cabinetry’s FSC certified construction, contact customer support. FSC products subject to production availability.

Smart Cabinetry has met the requirements set forth by NTA, Inc. for the Quality System Verification Program through an Audited Quality Systems Evaluation. Verification consists of periodic in-plant audits performed by NTA, Inc. Inspection Agency. All products are manufactured under a quality system complying with NTA, Inc. Standards.

Memberships

The Eco-Certified Composite™ (ECC) Sustainability Standard is the voluntary industry standard developed by the Composite Panel Association (CPA). The basis of the standard includes the CPA Carbon Calculator, a tool developed by a third party expert to assess the life cycle and carbon footprint of composite panels made at a particular manufacturing plant.

Membership benefits allow us to focus on what we do best; provide quality built cabinets at an affordable cost.

USGBC is Smart Cabinetry’s source for up-to-date, information on the LEED rating systems. Find more info about LEED at usgbc.org/leed
Wood & Finish Characteristics

*Maple*

The maple wood used by Smart Cabinetry comes from the colder climates of upper Michigan and Pennsylvania. These supplies are manufactured within 25 miles of our plant and delivered daily assuring Smart Customers the whitest of wood without developing any staining. Even though maple is quick growing, its grain is straight, fine-textured, and strong. Within the grain are variations in color ranging from light to dark reddish brown as well as mineral streaks, swirls, and pitch flecks. Over the years, the interaction of sunlight with the oxygen in the wood will give your cabinetry a soft golden glow.

*Northern Red Oak*

Smart Cabinetry receives its red oak wood components and panel products from vendors within 25 miles of our plant and delivered daily. Red oak's grain is quite dominant and varies from straight lines to arched or pointed patterns. Colors in the heartwood range from pink to green as well as from light to dark, whereas the sapwood of red oak is white to light brown. Like so many other woods, the color of red oak cabinetry deepens as the wood interacts with natural light. The wood is similar in general appearance to white oak, but with a slightly less pronounced figure due to the smaller rays.

*Painted Finishes*

We are pleased to offer painted finishes on many of our door lines. As climate and environments fluctuate in temperature and humidity, organic components will shrink and expand variably. These natural occurrences can create cracks and/or seems in the painted surface. Page 65 of this book discusses many situations that may arise from using painted cabinetry. It is important to understand how painted surfaces will behave prior to ordering your next kitchen.

*Smart Wood Finishes*

The coatings applied to our cabinets consist of LOW VOC environmentally safe materials. All top coats and stain coatings used by Smart Cabinetry meet or exceed Green Guard Emission Standards. In addition to our environmental stewardship, our coatings have a high degree of durability and resistance to stain. Above industry abrasion, chemical, impact, and scratch resistance are among our long list of advantages. Smart Cabinetry's coatings create less waste and use less energy, which ultimately allow us to continue our mission to deliver above industry value at affordable prices. Naturally, however, your choice of wood species will have the most impact on the cabinet’s final appearance, because wood grain and natural characteristics will show through stain colors. Color stains will render the actual color of the cabinet, bring out the natural beauty of the wood, and amplify those inherent "character marks." Softer areas of the wood will accept more stain and often appear darker than other areas. Potential "natural" variances in color cannot be controlled even with the latest technology in diamond tooling and sanding in multiple stations through out our facility. Differing densities inherently create different effects regardless of the hours expended selecting only the finest hardwoods.
Cleaning & Care

A soft cotton cloth dampened with warm water is usually sufficient to clean your cabinets. If more thorough cleaning is required, use on the following cleaning solutions:

- A mixture of dishwashing liquid and warm water.
- A mild all-purpose cleaner. Make sure it does not contain ammonia, silicone, or acid.

Use the mildest cleaning solution that will successfully clean your cabinets. Stronger products may damage or discolor your cabinet finish and are not recommended. After cleaning, wipe all surfaces with a clean, damp cloth. Dry immediately, using another soft, clean cloth.

Splatters and Spills

Clean spills and splatters immediately. Prolonged exposure to spills, including food, water, other liquids, oil, and grease splatters can cause permanent discoloration or damage to your cabinet’s finish.

Cleaning Products to Avoid

Avoid using the following products on your cabinets:

- Harsh chemicals including ammonia and bleach.
- Abrasive cleaning products such as tub and sink cleaners, scouring powder, scouring pads, or steel wool.
- Sponges or dish clothes. They may contain particles that could scratch your cabinets, or they may contain food and oil residue.
- Solvent-based or petroleum-based products such as mineral spirits, nail-polish removers or paint thinners.
- Silicone-based cleaning, waxing or polishing products.

Regular Dusting

Use a clean, soft, lint-free cotton cloth for regular dusting. Packaged dusting sheets are not required or recommended. Do not use pre-moistened dusting sheets, and do not use aerosol products made for dusting.

Waxing and Polishing

Waxing is not required or recommended. Over time, waxing and polishing compounds may build up on the surface of your cabinets and cause a hazy, streaky or yellowed appearance.

The cabinetry you have selected has its own personality and character, as well as a richness and depth in its color and grain. You may notice the variations in the grain and color of your cabinet if you have selected a natural or light finish. Variations will be less apparent with darker stains. Your Cabinets have been constructed from carefully selected quality hardwoods. Because imperfections are part of the natural beauty of hardwood, and not the result of the manufacturing of your cabinets, your warranty cannot cover differences in color, grain and other natural variations. Nor can it cover possible differences in color when adding new cabinetry to old. We encourage you to enjoy the natural beauty of solid wood and appreciate those characteristics that give it personality.
Cleaning & Care

Cleaning Glass Doors
Extra care is required when cleaning glass doors. Spray and ammonia-free glass cleaner on a clean, soft, lint-free cloth or paper towel. Do not spray cleaner directly on the glass. It could seep behind the window dividers and cause damage.

Scratches, Gouges, and Nicks
A touch-up kit is available to hide surface damage. Contact the sales representative or distributor where you purchased your cabinetry to purchase the color-matched touch-up kit for your specific cabinets. Use the kit’s touch-up pen to hide minor blemishes. Use the kit’s tinted putty stick to fill deeper scratches, gouges or nicks. Detailed instructions are provided in each kit.

Avoid Moisture Damage
Avoid draping damp clothes or dish towels over cabinet doors. This moisture can cause permanent damage, such as peeling and discoloration, to the cabinet’s finish.

Avoid Heat Damage
The heat generated when using an oven’s self cleaning feature is much greater than during normal use. This heat can damage nearby cabinetry. Although this is a rare occurrence, you can minimize the risk of heat damage by removing cabinet doors and drawers nearest the oven before using its self cleaning feature.

Avoid Light Damage
Exposure to direct sunlight tends to darken the color of natural wood products. Sunlight can also fade painted wood surfaces. You should consider draperies or blinds to shield your cabinets from direct sunlight.

Additional information about your cabinets can be found at www.smartcabinetry.com.
You may encounter some unavoidable situations that create minor problems with your cabinetry. Before calling your dealer/installer for help, consider the following:

Minor scratches or dents in your cabinetry can be treated with a touch up kit. For major damage like severe scratching, broken doors or drawers, paint spills, etc., call your dealer for help or replacement.

If over time screws become loose on hinges, you can achieve a temporary fix by gluing a small diameter dowel rod into the hole using a high quality wood glue. Cut the dowel rod flush with the top of the screw hole and place into the hole. Let the glue dry and then replace the screw. Do not overtighten, or you will risk stripping it out again.

Minor roughness in end grain can be corrected with "light weight sanding paper" and top coat. If concerned please call dealer.

In most cases your cabinetry is protected by our five year guarantee from the hardware manufacturer. For hinges and hardware that do not work properly, contact your dealer for assistance.

When adding additional cabinetry in the same room at a later date, consider the following:

To help minimize the color differences between any old and new units: Place the new cabinetry on a different wall, so any color difference won’t be as noticeable. Replace existing trim and molding with darker/lighter wood to give the old and new cabinets a unified look. Experiment with multiple finishes in the same wood species for a new look.

Features

Beautifully stained in a Pecan finish, this custom Prescott 3 piece full height display is a perfect showcase for all of your Smart Cabinetry doors and features.

Includes 28 slots for 13" x 16" door samples.

Lower drawer unit features standard\(^1\), full extension\(^2\), and full extension soft-close\(^3\) slides.

Roll out shelf kits\(^4\) installed inside door unit.

Cabinet is 84" tall, lower section is 24" deep.

---

1, 2, 3, 4 - from left to right: Standard drawer slide, full extension drawer slide, full extension soft-close drawer slide (shown closed), Roll out shelves (ROS2)

Door samples must be ordered separately. www.smartcabinetry.com/files/sample_order.pdf
Standard Construction Features

- 6-way Adjustable hinges (standard overlay detail)
- 6-way Adjustable hinges (full overlay detail)
- Solid Dovetail Drawers
- Adjustable shelves
- Particleboard construction (back detail)
- Removable False Front Drawer Clips
- I-beam Construction
- Water Resistant Flooring (Standard and standard plywood construction sink base and sink base vanities)
- Adjustable shelves

Upgraded Construction Features

- Plywood option (back detail)
- Plywood option (side detail)
- Side Mount Full Extension (100 lb dynamic)
- Side Mount Soft Close Full Extension (100 lb dynamic)
- Smart Ultimate Cabinet
- Detail of Ultimate base perimeter
Wall Cabinet Features

**Back**
½" woodgrain laminate rabbeted into ends, glued and stapled to top and bottom with industrial grade hot melt glue.

**End Panels**
½" substrate with light maple wood grain interior, designated laminate exterior.

**Frames**
¾" thick and 1 ½" wide, kiln-dried hardwood assembled under pressure with screws. Offers maximum strength and squareness.

**Tops and Bottoms**
½" substrate with light maple wood grain laminate interior and exterior.

**Adjustable Shelves**
¾" thick, 12" depth shelves, powder coated over MDF core. Attached with locking shelf clips.

**Hinges**
108° 6-way adjustable, self-closing concealed hinges.

**Increase Depth Cabinets MUST be installed between cabinets or end panels of the same depth.**

Base Cabinet Features

**Back**
½" woodgrain laminate rabbeted into ends, glued and stapled to top and bottom with industrial grade hot melt glue.

**Adjustable Shelves**
¾" thick, 12" depth shelves, powder coated over MDF core. Attached with locking shelf clips.

**End Panels**
½" substrate with light maple wood grain interior, designated laminate exterior.

**Frames**
¾" thick and 1 ½" wide, kiln-dried hardwood assembled under pressure with screws. Offers maximum strength and squareness.

**Drawers**
5½" solid dovetail drawers, featuring four-sided construction and captive ¼" matching laminate bottom.

**Hinges**
108° 6-way adjustable, self-closing concealed hinges.

**Braces**
Full depth braces provide I-beam stability and convenient anchor points for counter tops.

**Drawer Guides**
Features captive roller, (75lb) epoxy-coated stay-closed side guides.

**Floors**
Sink base floors are powder coated for extra durability.

**Toe Kicks**
4 ½" toe kicks with 3 ½" inset on all standard base cabinets.

</tr>
</tbody>
</table>

**IMPORTANT:** It is not advisable to install cabinets wider than 36 inches or deeper than 12 inches on a wall independently. If essential to ones kitchen, the installer of the kitchen must secure the cabinet to a permanent structure, i.e. interior wall.

**IMPORTANT:** Structural modification of a wall cabinet can significantly weaken the cabinet. For this reason modifications to Smart Cabinetry are not recommended, such as cutting the back to clear wall obstructions. If an obstruction exists, we suggest you first try to use cabinet(s) that do not require modifications. If modification is required, the warranty of the cabinet is void and it is the responsibility of the installer to take appropriate steps to compensate for any loss of strength or support due to the modification.

Soffit exists: Install permanently to a soffit by running four #10 lag bolts 3" in length through the top face frame into the "2x" structure (x4, x6, x8 or larger and a minimum) directly to the overhead structure or ceiling joist.

Soffit doesn’t exist: The cabinets must attach to an adjoining cabinet which is affixed to wall or permanent interior structure. If it is at the end of a cabinet run install a tall end panel (TEP) and attach to its frame establishing a "permanent" fixture supporting the cabinet permanently attached to the TEP which is permanently attached to the floor.

Failure to follow these instructions will void all warranties. The result could be the cabinet falling off the wall which becomes a liability not warranted by Smart Cabinetry.
Frequently Asked Questions

What is the lead time for my order?
Lead time begins after the 24 hour confirmation review and sign-off process.

Can I get an estimate for my shipping costs?
Estimates are available on request. Please contact Shipping Department for a quote. Freight estimates are valid for seven (7) business days. Freight estimates are also analyzed and quoted by the most economical mode of transport.

How do I know when my cabinets will deliver?
For the actual date of shipment, please contact the shipping department 3-4 days prior to the build date on your order’s confirmation.

How many cabinets can ship on one truck load?
250-300 cabinets or 3,000 cubes are standard for one truckload. (Subject to change according to SKU sizes)

What if my shipment is damaged?
If damage occurs during shipment, upon delivery notify the delivery driver of the damage and request that he/she make a note of the damage on the bill of lading. Sign the Bill of Lading, as proof of delivery; include identified damage noted on signed Bill of Lading. All damaged items need to be accepted by the customer. Do not reject damaged items.

Damage claims with will need to be filed on Smart Claims Form prior to shipping replacements. To file a damage claim please fill out claims form in its entirety then fax to Smart Cabinetry @ 1 866-836-5747. Include your order number, buyer’s name, shipping address and a brief description of damage. Send pictures of damage along with the claims form. Upon receipt of the claim form, Smart Cabinetry will send a confirmation. Smart Cabinetry cannot be held responsible for any labor costs accrued during the installation of products sold via any of its channels of distribution due to claim. This includes, but is not limited to, items that may be flawed or have become damaged in transit.

Notes: This policy does not cover freight damages or shortages due to shipping of product. Customer must receive product in accordance with Smart Cabinetry shipping and receiving policy, and may be required to submit information verifying the claim. These policies are set by our freight carriers, so failure to comply will result in loss of compensation for the customer.

*Production lead times are for standard new orders only. JCO and Claim orders are scheduled twice per week. JCO and Claim orders may close before 24 hour sign-offs to expedite production.
Accessorial Charges

We receive many questions regarding accessorial services and charges. Accessorial charges are fees for performing services beyond normal pick up, transport, and delivery. Accessorial Fees and types of services provided are subject to change without notice. Fees are included in the freight quote when services requested are understood at time of order. For a complete list of accessorial charges, contact logistics@smartcabinetry.com.

The origin, destination, zip codes, classification, shipping weight, and any additional services that may be required in transit, will determine actual charges. Rates and additional charges will be determined using our signed rules and accessorial charges in place at the time of pick up. If no signed rules and accessorial charges are in place at the time of pickup, rates will be subject to Smart Cabinetry’s rules. Final rates will be calculated based on actual freight characteristics and will be invoiced if additional charges apply. Note: Accessorial Services carry a nominal charge as such it is our customer’s responsibility to include the services necessary at time of order.

Installation Tips

Do not store cabinets in a moist environment. Wood products, especially one piece cabinet doors, absorb excess moisture in the air and can expand. These minor changes in size due to improper storage are not covered by Smart Cabinetry’s limited 5 year warranty. Store cabinets in a dry and conditioned environment.

Ensure the floor is level before starting any installation. It will be necessary to locate any uneven areas and shim or scribe cabinets in order to make the installation plumb, true and square.

Start with wall cabinets and begin in a corner. Measure from the corner to the first stud, and mark the measurement on the inside of the cabinet to be installed. Repeat this process for each and every stud. Drill a pilot hole through the back of the cabinet 3/4" down from the top and 3/4" up from the bottom. Fasten the cabinet to the wall with wood screws. Do not fully tighten the screws until all wall cabinets are in place.

Properly attach all wall cabinets to a soffit. Affix to a permanent structure by running lag bolts through the top face frame into the "2 x" structure directly overhead.

If soffit does not exist, the cabinets must be attached to an adjoining cabinet which is affixed to a permanent interior structure. For end of run cabinets, install a tall end panel and attach to its frame establishing a "permanent" fixture which supports the cabinet.

When installing a blind cabinet, make sure the cabinet is pulled out from the wall the appropriate distance as called for in your kitchen plan. See page 19 for guidelines about blind cabinet pull distances.

Adjust cabinet doors easily with a Phillips screwdriver. Rotate the micro screw nearest the door to adjust side to side. Loosen middle screw, align door, and tighten the screw to adjust the door’s height. Finally, rotate the cam screw near the inside of the cabinet to adjust the depth of the door.

For a more in depth installation guide, visit our website: smartcabinetry.com/cabinetinstallation.php
Claims Instructions

**Damage and/or product shortage:** Claims are valid when proper documents and documentation submitted and signed by the customer and the transportation company. Documents include Smart Claims Form, Signed BOL, and photographs of damage.

**Missing Items Claim:** Must be made at time of delivery and documented on the bill of lading. Claims can then be made via fax to 1 866-836-5747. Include Smart Claims Form, a copy of the signed BOL (proof of delivery), and notation of missing item.

**Damage Claims:** Must be made within 24 HOURS OF PRODUCT DELIVERY and documented on the bill of lading (BOL) in addition to a properly filled out Smart Claims Form. Claims must be submitted via fax to 1 866-836-5747. Pictures showing damage are required when submitting request for warranty / replacement of cabinets.

**Concealed Damage Claims:** Claims can be made up to 30 days after receipt of order. Signed BOL’s (Proof of Delivery), Smart Claim Form and pictures are necessary to process ones claim. Concealed Damage Claims are defined as requests made greater than 24 hours after original delivery date. Items claimed as "damage" are documented claims made within 24 hours of receipt of goods. Concealed Damage Claims costs are shared "pro-rata" between our organizations. Approved concealed damage claim value is no more or less than 50%. Concealed damages are a 50/50 split on replacement. Return Shipment is at customers expense.

Disclaimer for Painted Wood

Painted finish Agreement (provided by dealer/distributor) to be signed by customer before finalizing any orders containing special finishes.

All wood products naturally expand and contract with changes in temperature and humidity. This natural movement may cause painted finishes to develop separation lines or breaks where any two pieces of wood join together. These breaks may become more noticeable as time passes. Like other finishes, paint is also susceptible to changes in color due to exposure to natural light, extreme heat, smoke, and abrasive cleaners. Areas with additional contact with water or fluids onto doors or drawer fronts could break-down the finish with overexposure.

Therefore, for the reasons stated above, the warranty of Smart Cabinetry’s painted product (special finishes), STRUCTURALLY, is one year from date of purchase. However, there is no warranty and there is no implied period to warranty noticeable imperfections as discussed above.
Five Year Limited Warranty on Cabinets, excluding special finishes. Smart LLC, d/b/a Smart Cabinetry warrants to original purchaser for a period of five years from the original date of purchase that all components of Smart Cabinetry shall be free from defects in material and workmanship under normal use. This warranty is only applicable to products used in standard North American residential applications and is not transferable.

Should defects in material or workmanship exist during the applicable warranty period in any Smart LLC product, Smart Cabinetry will elect at its discretion to either repair or replace the defective material or component free of charge. This warranty covers only parts and materials of the products supplied by Smart Cabinetry. Not covered under this warranty are counter tops, appliances, plumbing fixtures, etc. or the costs, including labor, to remove and reinstall materials and related components such as fittings, appliances, etc. This warranty shall become void if the cabinets are in any way modified, improperly installed or damaged prior to or during the installation. This limited warranty applies only in the case of the standard residential application in the United States, and is void for all other applications. Furthermore, this warranty will not apply to cabinets damaged by misuse, neglect, abuse, acts of God, exposure to extreme temperatures, the effects of normal wear and tear or exposure to moisture including, but not limited to, excessive or continued exposure to moisture as a result of leakage, improper plumbing, flooding, etc.

Hardwoods may vary in color, characteristics and exhibit subtle changes as they age. Sunlight, smoke, household cleaners and other environmental conditions may also affect the color match over time. These variations are considered the nature of the material in relation to their environmental exposure and are not covered under this warranty.

Hardwoods will expand and contract physically when environmental changes occur in the normal setting of one’s kitchen. Changes in temperature, humidity, or prolonged moisture will cause normal “movement” in hardwood products. Hairline cracks or “separation” may appear consequently becoming visible over joint areas. Painted face frames, doors and other painted products (doors) may develop joint separation and visible cracks. Visual variations such as these are considered normal and customary in our industry. Characteristics developing from the materials used constructing Smart Cabinetry relative to its environment is not covered under Smart LLC 5 year limited warranty.

Smart Cabinetry’s five year limited warranty shall become void from the improper use of household chemicals. Alkaline-based detergents, ammonia or ammonia based cleaners, vinegar, strong solvent cleaners; mineral spirits, paint thinner or any other harsh cleaning chemical including citrus or citrus based or acid based cleaners or abrasive cleaning products severely affect the finish of a Smart Cabinet.

Smart Cabinetry reserves the right to alter design, specifications and materials without obligation to make similar changes to products previously manufactured. Periodically Smart Cabinetry will change the design, specifications, and materials, as conditions require and improvements developed without obligation to make similar changes to products previously manufactured. The repair(s) or replacement(s) are contingent upon the current product offerings of styles and construction options within the Smart Cabinetry Product Line at the time of the warranty claim. If a warranty claim is filed after a product has become obsolete, or has undergone design, specification or material changes, we reserve the right to honor the warranty in one
of the following manners:

1. To replace the affected component with a new component of the same style.
2. OR any affected component to achieve a uniform appearance with a comparable product style.

If components are replaced, Smart Cabinetry cannot guarantee the finish of these replacements will exactly match the finish and appearance of the components in the residential application due to the changes that occur during hardwoods natural aging process. Imperfections are part of its inherent natural beauty. Wood varies in color and characteristics that exhibit subtle changes as it ages. For example, white-painted face frames will eventually have visible seam lines at the joint areas, and individual cabinet wood species will darken or lighten with time. Imperfections are not the result of manufacturing ones cabinets, Smart Cabinetry’s Limited 5 Year Warranty will not cover differences in color, grain and natural variations including but not limited to those "character" imperfections indigenous to the species of hardwoods used by Smart Cabinetry nor does it cover possible differences in color when adding new cabinetry to old.

Smart Cabinetry does not warrant the installation of "stand alone" or independent cabinets in widths greater than thirty-six inches and depths greater than 12" inches. All cabinets regardless of design dimension or shape must be affixed to "studs", permanently fastened to interior wall, floor or ceiling joists attached to permanent structures i.e. interior partition wall or floor. IMPORTANT: Structural modification of a wall cabinet can significantly weaken the cabinet. For this reason modifications are not recommended, if modification is required, the warranty of the cabinet is void and it is the responsibility of the installer to take appropriate steps to compensate for any loss of strength or support due to the modification. *** SEE INSTALLATION INSTRUCTIONS

THIS WARRANTY IS THE EXCLUSIVE WARRANTY OF SMART CABINETRY AND IS IN LIEU OF AND SMART CABINETRY DISCLAIMS ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This warranty applies only to products manufactured or supplied by Smart Cabinetry. Any interpretation herein other than written is unwarranted.

This warranty applies only to products used in residential applications within the United States and is not transferable to subsequent owners. This warranty supersedes all previous warranties from date of issuance. This Warranty constitutes the exclusive remedy against SMART Cabinetry for alleged defects in materials and workmanship.

This warranty gives you specific legal rights and you may have other rights, which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

To obtain replacement(s) under Smart Cabinetry’s Five Year Limited warranty, first contact your authorized Smart Cabinetry dealer or distributor, who will arrange for inspection of the cabinet. A dated sales receipt as proof of purchase is required to obtain benefits from this warranty.

If you have difficulty obtaining assistance, please write: Smart Cabinetry, 70680 CR-23 New Paris, Indiana 46553.

Phone: (574) 831-5010 Fax: (574) 831-5018 or Email customerservice@smartcabinetry.com.
We are pleased to unveil our new 200,000 square foot building that was completed in the summer of 2014. In this state of the art building, we will be able to continue the quality and tradition for which Smart Cabinetry is known.

To view more pictures of our building go to www.smartcabinetry.com/facility.
